***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lee et al. (US 6,859,435) in view of Applicant's admitted prior art.

1. Regarding claims 1, 3-4, 6, 8-9, 11-12, Lee discloses a method for transmitting frames comprising determining a frame's priority based on a hop count (col. 4, lines 11-19), placing a frame in a priority queue (fig. 2), where a low priority packet is sent if enough high priority packets are sent.
2. However, Lee does not disclose Fibre Channel. Applicant discloses that Fibre Channel is a well-known standard (specification, pages 1-4). Therefore, it would have been obvious to one skilled in the art at the time the invention was made to use Fibre Channel in the invention of Lee in order to provide an alternative transmission format as desired.
3. Regarding claim 2, 10, a packet is transmitted then appropriate as determined by counters (fig. 9, step 901-903; fig. 10, steps 1005).
4. Regarding claim 5, 7, 13, packets that are close to the destination (low hop count as claimed) receive a higher priority (col. 4, lines 11-19).
